How to enroll patients to the Remote Patient Monitoring (RPM) Program

Remote Patient Monitoring is a free at-home monitoring program available to patients in the Eastern Health region. Patients receive education and monitoring while providing their health data remotely.

This innovative program was established to help patients improve their quality of life by providing education and monitoring. The goal is to improve self-management, and prevent repeat flare-ups that often lead to emergency department visits and hospital readmissions.

Who meets the criteria for the RPM Program?

- A clinical diagnosis of:
 - Heart Failure (HF)
 - Chronic Obstructive Pulmonary Disease (COPD)
 - Diabetes
- Emergency Department visit or acute hospital admission greater than or equal to 1 in a year (related to symptoms of HF, COPD or Diabetes)
- Age greater than or equal to 18 years
- Lives in a residential setting with internet or cellular service capabilities within Eastern Health's regional boundaries

Referral Information for the RPM Program:

Patient's Name: _____ HCN: _____

Address: _____ Postal Code: _____

Telephone: _____

Alternate Contact: Name: _____ Telephone: _____ Relationship: _____

Classification of COPD: _____

Classification of HF: _____

Diabetes Type: _____

Referring Practitioner's Name: _____ Date: DD/MONTH/YYYY

Referring Practitioner's Signature: _____
