

STEAMPLICITY

- JUST FRESHLY COOKED -

Simple Cooking

- Groundbreaking, patented technology using pressure valve for steam-cooked, fresh, healthy food in minutes
- Commercial microwaves freshly steam-cook meals on patient care units
- Microwaves preprogrammed for meals heated for three plus minutes
- Water molecules in food heated to 120°C generating steam pressure
- Valve control system regulates pressure throughout cooking process
- Each meal temperature probed once heated
- Minimum serving temperature of 74°C
- Proven to use less water and energy and results in less food waste
