

2022

COMMUNITY

Health Assessment Survey

**Bonavista
Results
Summary**

**Eastern
Health**

Letters with the web address to access the survey, and a survey code, were distributed via mail to those selected to complete the survey. Recipients of the letter were asked to complete the survey within two weeks. The NLSA also completed telephone reminder calls, during which offers were made to email the survey link or mail out a paper copy of the survey with a return envelope.

The following results section highlights the main themes and areas of interest for Bonavista as identified by the CHA survey. To view full detailed CHA results tables, refer to Appendix A. A copy of the CHA survey can be found in Appendix B.

RESULTS

Demographics

A total of 199 surveys were completed for Bonavista. Since 1,393 were randomly selected to complete the survey, this represents a response rate of 14.3%.

The number of respondents required to obtain a confidence level of 95% ± 7% was 191, which means the response goal for Bonavista was met.

199
Respondents

The following is a profile of survey respondents from Bonavista:

- The majority lived in their community for more than 20 years (69.3%; n=138)
- Most respondents reported their highest level of education completed as completed a technical, vocational or community college program (33.7%; n=67)
- Most respondents were employed full-time (33.7%; n=67)
- Most respondents were between 55-64 (21.1%; n=42) and 65-74 (28.6%; n=57) years of age

Primary Care Provider

The following section addresses access to a primary care provider (i.e., family doctor, nurse practitioner) and satisfaction with the quality of services received.

According to the survey results, the most commonly reported way to find health-related information is to:

1	Ask a pharmacist	51.8% (n=103)
2	Ask a family doctor	49.7% (n=99)
3	Search the internet (e.g., WebMD, Google search)	48.2% (n=96)

The last time respondents needed care for a minor health problem (e.g., fever or unexplained rash), the most went to:

1	Family doctor/nurse practitioner	33.7% (n=67)
2	Hospital emergency department	24.6% (n=49)
3	Walk-in clinic	14.1% (n=28)

*15.6% (n=31) chose not to seek treatment

When asked how long it took to receive treatment for their last minor health problem, 58.5% (n=93) reported that they received treatment the same day, while 5.7% (n=9) reported that they received treatment the next day. Additionally, 26.4% (n=42) reported that it took two days or more to receive treatment, and 9.4% (n=15) reported that they never received treatment or left before receiving treatment.

Respondents were asked if they currently have a family/primary care doctor or nurse practitioner and their level of satisfaction with their provider.

Results indicate that 78.9% (n=157) have a family doctor or nurse practitioner. Of this 78.9%:

- 82.8% (n=130) reported being satisfied or very satisfied with their family/primary care doctor or nurse practitioner.
- Only 2.5% (n=4) reported being dissatisfied or very dissatisfied with their family/primary care doctor or nurse practitioner, indicating that the wait list for an appointment is too long.

The health care system provides a full continuum of health and community services, including public health, long-term care, acute (hospital) care, and private health care providers (e.g., pharmacy, private specialist clinics, vision/dental clinics). Survey respondents were asked about access to the health-care system and satisfaction with the quality of services received.

When asked about accessing health care services within the last 12 months, the majority of participants (71.9%; n=143) indicated they were able to access the required health services, while 28.1% (n=56) of respondents indicated that there were health services that they required and were unable to access.

The following are the top reasons respondents were unable to access a required health service:

1	Wait time for service was too long	71.4% (n=40)
2	Service not available	26.8% (n=15)
3	Too far to travel	14.3% (n=8)
4	Unable to access the services during scheduled time/hours of service	14.3% (n=8)

According to survey results, the majority of respondents (59.8%; n=119) were satisfied or very satisfied with the health care services they have used in the past 12 months, while 11.6% (n=24) of respondents were dissatisfied or very dissatisfied. The respondents who indicated they were dissatisfied or very dissatisfied with the health care services they used in the past 12 months, were asked to indicate the reasons why they were dissatisfied. The top reason identified was that the wait list for an appointment was too long (n=11).

Community Health and Wellness

Survey respondents were asked about the health and wellness of their community as well as their satisfaction with the resources and services available within their community. Respondents were provided a list of various areas/issues and were asked to indicate which ones they were most concerned about in their community. The list provided to respondents was slightly modified in 2022 based on experience with the 2019 survey and input from stakeholders. The most commonly selected areas/issues were:

1	Cost of living	79.9% (n=159)
2	Road quality	78.4% (n=156)
3	Emergency services	70.9% (n=141)
4	Addictions and substance abuse	61.8% (n=123)
5	Chronic diseases	56.8% (n=113)

Of the issues/areas that respondents selected, they were then asked to rank their top three areas/issues they are **most** concerned about. The top five ranked answers were:

1	Cost of living	57.4% (n=113)
2	Emergency services	55.3% (n=109)
3	Road Quality	34.5% (n=68)
4	Addictions and substance abuse	28.4% (n=56)
5	Chronic diseases	22.8% (n=45)

There are many different groups and resources that aim to improve the health and wellness of a community. These include Eastern Health private health clinics (e.g., pharmacy, private specialist clinics, vision/dental clinics), churches, schools, town councils, resource centres, community advisory committees, recreation spaces/gyms, libraries, and other community groups (e.g., service clubs, coalitions, social and recreational groups.)

Respondents were asked to rate their level of satisfaction with the resources available to help deal with the health and wellness challenges in their communities. Most respondents (43.7%; n=87) were neither satisfied nor dissatisfied with the resources available, while 33.2% (n=66) were dissatisfied or very dissatisfied and 23.1% (n=46) were satisfied or very satisfied. Respondents who indicated they were either dissatisfied or very dissatisfied were asked to explain which aspects of the health and wellness resources they are dissatisfied with. The following were the most common responses:

1	Community resources/supports are not available	74.2% (n=49)
2	Community resources/supports are not effective	27.3% (n=18)
3	Hours of service(s) are inconvenient	22.1% (n=14)

Self-Reported Health Status

The following section describes the health of the population who completed the survey. Most respondents reported that their physical health was good (40.7%; n=81), or very good (30.2%; n=60). Most respondents reported that their mental health was very good (33.7%; n=67) or good (33.7%; n=67).

Survey respondents were asked what they would like to do to improve their physical and/or mental health and what was making it difficult to make the changes they identified. The top three things individuals would like to do to improve their physical and/or mental health were:

1	Eat healthier/eat more fruits and vegetables	68.3% (n=136)
2	Start/increase exercise, sports or physical activity	64.8% (n=129)
3	Reduce stress	48.7% (n=97)

While 25.1% (n=47) of respondents indicated that there was nothing in particular making it difficult to make these changes, the following were the top three barriers identified by respondents:

1	Community resources/supports are not available	29.9% (n=56)
2	Not enough time available	29.9% (n=56)
3	Cost is too high	28.3% (n=53)

Health Care Planning

As we transition to one provincial health authority, information gathered from Eastern Health's CHA survey is one tool that will inform the development of the Provincial strategic plan.

In the 2019 survey, respondents were asked to indicate which values they think Eastern Health should adopt. As a result of responses to that survey, as well as consultation with Eastern Health staff, executive and Board of Trustees, the values were changed to add accountability, caring, and collaboration (replacing fairness, connectedness, and integrity). For the 2022 survey, respondents were provided with Eastern Health's new list (accountability, caring, collaboration, excellence, and respect) and asked to what extent Eastern Health is living up to them. Most respondents (45.2%; n=90) neither agreed nor disagreed, 32.7% (n=65) disagreed or strongly disagreed, while 22.1% (n=44) either agreed or strongly agreed.

Respondents were asked to report the one priority area that Eastern Health should focus on to improve the care and services delivered. The top responses were:

1	Emergency Services	85.4% (n=170)
2	Primary Health Care	71.4% (n=142)
3	Mental Health and Addictions	56.3% (n=112)
4	Recruitment/retention of staff	52.3% (n=104)
5	Specialists	48.2% (n=96)
6	Appointments (scheduling, notifications)	45.2% (n=90)

Concluding Remarks

To conclude the survey, respondents were asked if there was anything else they would like to add. The majority of respondents provided no additional comments. For those who did, the most common response was the need more doctors/nurses/healthcare professionals/increased availability/access to healthcare (18.1%; n=36).

CONCLUSION

The 2022 Community Health Assessment Survey results will support health care planning for the provincial health authority, as well as planning in the Eastern zones. The information obtained provides valuable insight into the communities within the region with regard to health care and community concerns, as well as things that are working well or could be improved.

In terms of survey administration, Eastern Health’s partnership with NLSA allowed for a random sampling methodology. Although this method took more time and garnered fewer respondents in comparison to the 2019 survey, it was successful in improving the representativeness of the sample, especially regarding gender and education level. However, comparing both sampling methods illustrated that there is more work to be done to improve response rates for young adults (18-34 years of age), as neither method was able to produce the desired number of responses for that age group.

APPENDIX A: SURVEY RESULTS

EASTERN HEALTH
Community Health Assessment 2022
Results For Bonavista

SECTION A - PRIMARY CARE PROVIDER

A1. If you needed to find health-related information for yourself or someone else today, how would you get that information? (Select all that apply.)

	Total	
	N	%
Ask a family doctor	99	49.7%
Ask a nurse practitioner	54	27.1%
Ask a pharmacist	103	51.8%
Ask a community or public health nurse	30	15.1%
Call/visit a hospital/clinic	78	39.2%
Search the internet (e.g., WebMD, Google search)	96	48.2%
Search the Eastern Health website	19	9.5%
Search social media (e.g., Facebook, Twitter)	10	5.0%
Use 811 HealthLine	55	27.6%
Contact a not-for-profit agency (e.g., Cancer Society, Mental Health Association) or a community group, church group or library	5	2.5%
Ask a friend or family member	59	29.6%
Ask another health professional (please specify):	8	4.0%

APPENDIX B: EASTERN HEALTH COMMUNITY HEALTH ASSESSMENT SURVEY

EASTERN HEALTH COMMUNITY HEALTH ASSESSMENT 2022

PURPOSE

Eastern Health, in partnership with the Newfoundland and Labrador Statistics Agency (NLSA), is doing a survey to help us understand the community health needs in the Eastern Health region.

CONFIDENTIALITY

The information is being collected and protected under the authority of the [Access to Information and Protection of Privacy Act 2015](#) (ATIPPA, 2015) of the Province of Newfoundland and Labrador. Information collected will be shared with Eastern Health for the purposes of assessing specific community health needs. Please be assured that your answers will be kept strictly confidential, and any results published from this survey will be reported collectively. No identifying information will be published. The survey will take approximately 15 minutes to complete.

If you have any questions concerning privacy or confidentiality, have difficulty accessing or completing the survey, or would like to be sent an electronic link or paper copy, you can contact the Newfoundland and Labrador Statistics Agency by email at NLSASurveys@gov.nl.ca or by telephone, toll-free, at 1-888-461-5244. Please note that if you call the toll-free number, you will be asked to leave a message. Representatives from Eastern Health are also available to answer any other questions you may have about the survey:

- Email: planning@easternhealth.ca
- Phone: toll free at 1-833-960-4570

INSTRUCTIONS

For the purposes of navigating through the survey, the arrow pointing to the right will take you forward to the survey's next page, and the arrow pointing to the left will return you to the survey's previous page.

While completing the survey, you may exit at any time by closing your internet browser. When you are ready to resume, simply use the link and Survey Access Code provided to again access the survey. Your previous responses will be saved, and you will resume where you left off. However, once the final question has been answered and the

responses submitted, the survey will no longer be accessible. If this occurs, and you would like to change one or more of your responses, please contact the NLSA at NLSASurveys@gov.nl.ca.

[Please proceed to the next page to begin the survey.]

SECTION A – PRIMARY CARE PROVIDER

AR1. The following questions ask about your access to a primary care provider (family doctor, nurse practitioner) and your satisfaction with the quality of services received. This section applies to both virtual and in-person care.
[Please proceed to the next page.]

A1. If you needed to find health-related information for yourself or someone else today, how would you get that information? (Select all that apply)

- 1 Ask a family doctor
- 2 Ask a nurse practitioner
- 3 Ask a pharmacist
- 4 Ask a community or public health nurse
- 5 Call/visit a hospital/clinic
- 6 Search the internet (e.g., WebMD, Google search)
- 7 Search the Eastern Health website
- 8 Search social media (e.g., Facebook, Twitter)
- 9 Use 811 HealthLine
- 10 Contact a not-for-profit agency (e.g., Cancer Society, Mental Health Association) or a community group, church group, or library
- 11 Ask a friend or family member
- 12 Ask another health professional (please specify): _____

A2. The last time you needed care for a minor health problem (e.g., fever or unexplained rash), where did you go? (Select one response only)

- 1 Family doctor/nurse practitioner
- 2 Private-pay physician or nurse practitioner

- 3 Walk-in clinic**
- 4 Collaborative team clinic**
- 5 Hospital emergency department**
- 6 811 HealthLine**
- 7 Pharmacist**
- 8 I do not have a place to get care for a minor health problem [Go to A4]**
- 9 I chose not to seek treatment [Go to A4]**
- 97 Other (please specify): _____**

A3. The last time you needed care for a minor health problem (e.g., fever or unexplained rash), how long did it take you to receive treatment? (Select one response only)

- 1 Received treatment the same day**
- 2 Received treatment the next day**
- 3 Took two days or more to receive treatment**
- 4 Never received treatment/left before receiving treatment**

A4. Do you currently have a regular family doctor or nurse practitioner?

- 1 Yes**
- 2 No [Go to BR1]**

A5. Overall, how satisfied are you with the services provided by your family doctor/nurse practitioner?

- 1 Very satisfied [Go to BR1]**
- 2 Satisfied [Go to BR1]**
- 3 Neither satisfied nor dissatisfied [Go to BR1]**
- 4 Dissatisfied**
- 5 Very dissatisfied**

A6. Why are you dissatisfied with the services provided by your family doctor/nurse practitioner? (Select all that apply)

- 1 Unable to easily contact the clinic/office
- 2 Offered virtual visit when an in-person visit is preferred
- 3 Wait list for an appointment is too long
- 4 Wait time in the clinic/office or window for virtual care visit is too long
- 5 Too far to travel
- 6 Hours of service are inconvenient
- 7 Communication barrier
- 8 Equipment quality is poor

A6. (cont.)

- 9 Health care provider(s) do not give you a chance to ask questions
- 10 You do not have trust and confidence in your health care provider(s)
- 11 Health care provider(s) do not treat you with respect
- 12 Health care provider(s) do not explain things in a way that is easy to understand
- 13 Health care provider(s) do not involve you in decisions about your care
- 14 Health care appointment(s) are rushed or limited to one issue per visit
- 97 Other (please specify): _____

SECTION B – HEALTHCARE

BR1. The health care system provides a full continuum of health and community services, including public health, long-term care, acute (hospital) care, and private health care providers (e.g. pharmacy, private specialist clinics, vision/dental clinics). The following questions ask about your access to the health-care system and your satisfaction with the quality of services received (please DO NOT include Family Doctor/Nurse Practitioner services, as these were indicated previously). *[Please proceed to the next page.]*

B1. Sometimes we require health-care services but are unable to access them. Have you required any health-care service that you were unable to access during the past 12 months?

- 1 Yes**
- 2 No [Go to B3]**

B2. Why were you unable to access services that you required during the past 12 months? (Select all that apply)

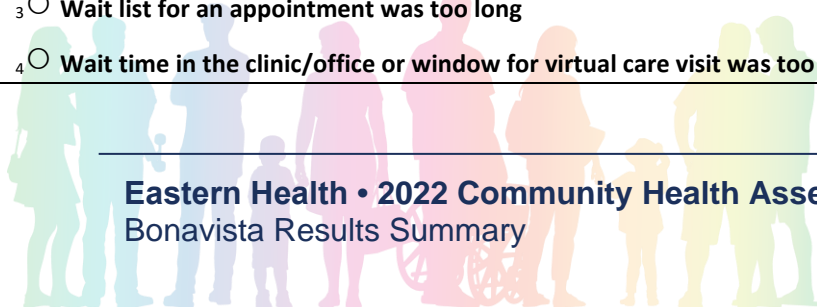

- | | |
|---|--|
| <input type="radio"/> 1 Wait time for service was too long | <input type="radio"/> 7 Unable to get a referral |
| <input type="radio"/> 2 Cost of service was too high | <input type="radio"/> 8 Unable to contact the service |
| <input type="radio"/> 3 Transportation issues | <input type="radio"/> 9 Communication barrier |
| <input type="radio"/> 4 Too far to travel | <input type="radio"/> 10 Did not know the service was available at the time |
| <input type="radio"/> 5 Unable to leave the house due to health problems | <input type="radio"/> 11 Service not available |
| <input type="radio"/> 6 Unable to access the services during scheduled time/hours of service | <input type="radio"/> 97 Other (please specify): _____ |

B3. Overall, how satisfied were you with the health-care services that you did use during the past 12 months?

- 1 Very satisfied [Go to CR1]**
- 2 Satisfied [Go to CR1]**
- 3 Neither satisfied nor dissatisfied [Go to CR1]**
- 4 Dissatisfied**
- 5 Very dissatisfied**
- 6 I have not used any health-care services in the past 12 months [Go to CR1]**

B4. Why were you dissatisfied with the health-care services that you did use during the past 12 months? (Select all that apply)

- 1 Unable to easily reach the clinic/office**
- 2 Offered virtual visit when an in-person visit was preferred**
- 3 Wait list for an appointment was too long**
- 4 Wait time in the clinic/office or window for virtual care visit was too long**

- 5 Too far to travel
- 6 Hours of service were inconvenient
- 7 Cost of service was too high
- 8 Communication barrier
- 9 Equipment quality was poor
- 10 Health-care provider(s) did not give you a chance to ask questions
- 11 You did not have trust and confidence in your health-care provider(s)
- 12 Health-care provider(s) did not treat you with respect
- 13 Health-care provider(s) did not explain things in a way that was easy to understand
- 14 Health-care provider(s) did not involve you in decisions about your care
- 15 Health care appointment(s) were rushed or limited to one issue per visit
- 97 Other (please specify): _____

SECTION C – COMMUNITY HEALTH AND WELLNESS

CR1. The following questions ask about the health and wellness of your community, as well as your satisfaction with the resources and services available within your community. *[Please proceed to the next page.]*

C1. Please select the areas/issues that you are concerned about in your community. (Select all that apply)

- 1 Addictions and substance use (e.g., alcohol and/or drug misuse and abuse, gambling)
- 2 Bullying
- 3 Childcare (including affordability, lack of accessibility)
- 4 Chronic diseases (e.g., prevalence of diabetes, high blood pressure, cancer, etc.)
- 5 Crime and violence
- 6 Cost of living

- 7 Clean water supply
- 8 Distracted driving of any vehicle (e.g. texting or talking on cell phone while driving car, motorcycle, ATV, snowmobile, etc.)
- 9 Drug/alcohol impaired driving of any vehicle (e.g. car, motorcycle, ATV, snowmobile, etc.)
- 10 Education system
- 11 Emergency services
- 12 Environmental issues (e.g., contaminants in the air, water and soil)
- 13 Food security (access to sufficient, affordable, nutritious food)
- 14 Homelessness (including couch surfing)
- 15 Housing conditions
- 16 Low literacy levels
- 17 Mental health of community residents
- 18 Outmigration
- 19 Physical health of community residents
- 20 Poverty
- 21 Public transportation (including affordability, lack of accessibility)
- 22 Recreation programs/spaces
- 23 Resources for people with disabilities (e.g., accessible buildings)
- 24 Road quality
- 25 Seniors' resources/programs
- 26 Sexual health (including unplanned pregnancy, Sexually Transmitted Infections)

C1. (cont.)

- 27 Social isolation and lack of community involvement
- 28 Suicide
- 29 Tobacco use/smoking/vaping
- 30 Unemployment
- 31 Violence in the home (e.g., child abuse/neglect, domestic)
- 32 Working conditions (e.g., risks for injury on the job)
- 97 Other (please specify): _____

33 I am not concerned about the health and wellness of my community [Exclusive Response] [Go to C3]

[Programming note: if the respondent only chooses one option in C1, they will skip to C3]

C2A. (If number of options chosen in C1 \geq 3) Of the issues selected in the previous question, please rank the 3 that you are most concerned about.

One at a time, click and drag an issue from the left column and drop it in the empty box on the right until the box contains the 3 issues you are most concerned about. Next, arrange the 3 issues in the box on the right in order so that the issue you are most concerned about is first, the one of next concern is second and the one of least concern is third.

C2B. (If number of options chosen in C1=2) Next, we want you to please rank the 2 issues from the previous question that you are most concerned about.

One at a time, click and drag an issue from the left column and drop it in the empty box on the right until the box contains the 2 issues you are most concerned about. Next, arrange the 2 issues in the box on the right in order so that the issue you are most concerned about is first and the one of lesser concern is second.

- 1 Addictions and substance use (e.g., alcohol and/or drug misuse and abuse, gambling)
- 2 Bullying
- 3 Childcare (including affordability, lack of accessibility)
- 4 Chronic diseases (e.g., prevalence of diabetes, high blood pressure, cancer, etc.)
- 5 Crime and violence
- 6 Cost of living
- 7 Clean water supply
- 8 Distracted driving of any vehicle (e.g. texting or talking on cell phone while driving car, motorcycle, ATV, snowmobile, etc.)
- 9 Drug/alcohol impaired driving of any vehicle (e.g. car, motorcycle, ATV, snowmobile, etc.)
- 10 Education system

C2A/C2B. (cont.)

- 11 Emergency services
- 12 Environmental issues (e.g., contaminants in the air, water and soil)
- 13 Food security (access to sufficient, affordable, nutritious food)
- 14 Homelessness (including couch surfing)

- 15 Housing conditions
- 16 Low literacy levels
- 17 Mental health of community residents
- 18 Outmigration
- 19 Physical health of community residents
- 20 Poverty
- 21 Public transportation (including affordability, lack of accessibility)
- 22 Recreation programs/spaces
- 23 Resources for people with disabilities (e.g., accessible buildings)
- 24 Road quality
