Health

# INTRODUCTION

Community Health Assessments (CHAs) are one of many tools that aim to engage community members in health-care service planning through collecting, analyzing, and presenting information to assist in understanding and improving the health of a population. CHAs are conducted using a population health approach, which focuses heavily on the social determinants of health. The CHA process involves gathering data from a variety of sources that provide information about health-care service delivery within a region, as well as the health status and health-related needs of a population.

Eastern Health followed provincial direction as outlined in the draft *Community Health Assessment Guidelines* in the development of this CHA. The draft guidelines were developed as a partnered approach among the four Regional Health Authorities (RHAs), the Newfoundland and Labrador Centre for Health Information (NLCHI), and the Department of Health and Community Services (HCS) in an effort to standardize the CHA process.

Eastern Health partnered with the Newfoundland and Labrador Statistics Agency (NLSA) during the administration of the 2022 CHA survey.

## METHODOLOGY

The Eastern Health CHA survey was used to collect quantitative and qualitative data from residents of the region about where they find health-related information, where they go for care, satisfaction with health care services, community concerns, satisfaction with health and wellness resources, and health behaviors.

The CHA survey was administered between July and December 2022 to 13,830 selected individuals, age 18 and over, who resided in the Eastern region. Survey samples were calculated using a stratified random sampling method based on the populations within each of Eastern Health's ten Primary Health Care (PHC) areas. A minimum number of individuals from each PHC service area was sampled in order to obtain a confidence level of  $95\% \pm 7\%$ .

The ten PHC service areas are defined based on geographic proximity and service delivery. Areas include Bell Island, Bonavista Peninsula, Burin Peninsula, Clarenville and area, Conception Bay Centre, Northeast Avalon/St. John's metro region, Placentia area-Cape Shore, Southern Shore, St. Mary's Bay and Trinity-Conception.

Letters with the web address to access the survey, and a survey code, were distributed via mail to those selected to complete the survey. Recipients of the letter were asked to complete the survey within two weeks. The NLSA also completed telephone reminder calls, during which offers were made to email the survey link or mail out a paper copy of the survey with a return envelope.

The following results section highlights the main themes and areas of interest for Conception Bay North (CBN) as identified by the CHA survey. To view full detailed CHA results tables, refer to Appendix A. A copy of the CHA survey can be found in Appendix B.

# RESULTS

## Demographics

A total of 237 surveys were completed for CBN. Since 1,451 were randomly selected to complete the survey, this represents a response rate of 16.3%.

The number of respondents required to obtain a confidence level of 95% ± 7% was 195, which means the response goal for CBN was met.

The following is a profile of survey respondents from CBN:

- The majority lived in their community for more than 20 years (65.8%; n=156)
- Most respondents reported their highest level of education completed as completed a technical, vocational or community college program (35.9%; n=85)
- Most respondents were retired from paid work (35.0%; n=83)
- Most respondents were between 55-64 (24.9%; n=59) and 65-74 (24.5%; n=58) years of age

**237**  
Respondents

## Primary Care Provider

The following section addresses access to a primary care provider (i.e., family doctor, nurse practitioner) and satisfaction with the quality of services received.

According to the survey results, the most commonly reported way to find health-related information is to:

<b>1</b>	Ask a family doctor	<b>65.0%</b> (n=154)
<b>2</b>	Search the internet (e.g., WebMD, Google search)	<b>44.7%</b> (n=106)
<b>3</b>	Ask a pharmacist	<b>42.6%</b> (n=101)

The last time respondents needed care for a minor health problem (e.g., fever or unexplained rash), the most went to:

<b>1</b>	Family doctor/nurse practitioner	<b>56.5%</b> (n=134)
<b>2</b>	Hospital emergency department	<b>10.5%</b> (n=25)

\*10.5% (n=25) chose not to seek treatment

When asked how long it took to receive treatment for their last minor health problem, 43.2% (n=86) reported that they received treatment the same day, while 14.6% (n=29) reported that they received treatment the next day. Additionally, 38.2% (n=76) reported that it took two days or more to receive treatment, and 4.0% (n=8) reported that they never received treatment or left before receiving treatment.

Respondents were asked if they currently have a family/primary care doctor or nurse practitioner and their level of satisfaction with their provider.

Results indicate that 77.6% (n=184) have a family doctor or nurse practitioner. Of this 77.6%:

- 81.0% (n=149) reported being satisfied or very satisfied with their family/primary care doctor or nurse practitioner.
- 6.5% (n=12) reported being dissatisfied or very dissatisfied with their family/primary care doctor or nurse practitioner and indicating that wait list/wait time is too long.

The health care system provides a full continuum of health and community services, including public health, long-term care, acute (hospital) care, and private health care providers (e.g., pharmacy, private specialist clinics, vision/dental clinics). Survey respondents were asked about access to the health-care system and satisfaction with the quality of services received.

When asked about accessing health care services within the last 12 months, the majority of participants (74.3%; n=176) indicated they were able to access the required health services, while 25.7% (n=61) of respondents indicated that there were health services that they required and were unable to access.

**74.3%**

of respondents able to  
access the required  
health services

The following are the top three reasons respondents were unable to access a required health service:

<b>1</b>	Wait time for service was too long	<b>62.3%</b> (n=38)
<b>2</b>	Unable to get a referral	<b>18.0%</b> (n=11)

According to survey results, the majority of respondents (57.4%; n=136) were satisfied or very satisfied with the health care services they have used in the past 12 months, while 17.3% (n=41) of respondents were dissatisfied or very dissatisfied. The respondents who indicated they were dissatisfied or very dissatisfied with the health care services they used in the past 12 months, were asked to indicate the reasons why they were dissatisfied. The top reasons selected were wait list for an appointment was too long (n=21) and wait time in the clinic/office or virtual care visit was too long (n=20).

## Community Health and Wellness

Survey respondents were asked about the health and wellness of their community as well as their satisfaction with the resources and services available within their community. Respondents were provided a list of various areas/issues and were asked to indicate which ones they were most concerned about in their community. The list provided to respondents was slightly modified in 2022 based on experience with the 2019 survey and input from stakeholders. The most commonly selected areas/issues were:

1	Cost of living	73.4% (n=174)
2	Road quality	53.6% (n=127)
3	Addictions and substance abuse	52.3% (n=124)
4	Emergency services	46.0% (n=109)
5	Drug/alcohol impaired driving of any vehicle	45.6% (n=108)

Of the issues/areas that respondents selected, they were then asked to rank their top three areas/issues they are **most** concerned about. The top five ranked answers were:

1	Cost of living	59.2% (n=129)
2	Emergency services	28.9% (n=63)
3	Addictions and substance abuse	26.6% (n=58)
4	Chronic diseases	20.6% (n=45)
5	Road Quality	18.3% (n=40)

There are many different groups and resources that aim to improve the health and wellness of a community. These include Eastern Health private health clinics (e.g., pharmacy, private specialist clinics, vision/dental clinics), churches, schools, town councils, resource centres, community advisory committees, recreation spaces/gyms, libraries, and other community groups (e.g., service clubs, coalitions, social and recreational groups.)

Respondents were asked to rate their level of satisfaction with the resources available to help deal with the health and wellness challenges in their communities. Most respondents (45.6%; n=108) were neither satisfied nor dissatisfied with the resources available, while 27.4% (n=33) were dissatisfied or very dissatisfied, and 27.0% (n=32) were satisfied or very satisfied. Respondents who indicated they were either dissatisfied or very dissatisfied were asked to explain which aspects of the health and wellness resources they are dissatisfied with. The following were the most common responses:

<b>1</b>	Community resources/supports are not available	<b>64.6%</b> (n=42)
<b>2</b>	Community resources/supports are not effective	<b>40.0%</b> (n=26)
<b>3</b>	Hours of service(s) are inconvenient	<b>29.2%</b> (n=19)

## Health Status (Self-Reported)

The following section describes the health of the population who completed the survey. Most respondents reported that their physical health was good (35.9%; n=85) or very good (31.2%; n=74). Most respondents reported that their mental health was very good (34.2%; n=81) or good (30.0%; n=71).

Survey respondents were asked what they would like to do to improve their physical and/or mental health and what was making it difficult to make the changes they identified. The top three things individuals would like to do to improve their physical and/or mental health were:

<b>1</b>	Eat healthier/eat more fruits and vegetables	<b>66.2%</b> (n=157)
<b>2</b>	Start/increase exercise, sports or physical activity	<b>58.2%</b> (n=138)
<b>3</b>	Reduce stress	<b>38.4%</b> (n=91)

While 22.3% (n=48) of respondents indicated that there was nothing in particular making it difficult to make these changes, the following were the top three barriers identified by respondents:

<b>1</b>	Cost is too high	<b>34.4%</b> (n=74)
<b>2</b>	Not enough time available	<b>28.8%</b> (n=62)
<b>3</b>	Community resources/supports are not available	<b>24.7%</b> (n=53)

As we transition to one provincial health authority, information gathered from Eastern Health's CHA survey is one tool that will inform the development of the Provincial strategic plan.

In the 2019 survey, respondents were asked to indicate which values they think Eastern Health should adopt. As a result of responses to that survey, as well as consultation with Eastern Health staff, executive and Board of Trustees, the values were changed to add accountability, caring, and collaboration (replacing fairness, connectedness, and integrity). For the 2022 survey, respondents were provided with Eastern Health's new list (accountability, caring, collaboration, excellence, and respect) and asked to what extent Eastern Health is living up to them. Most respondents 40.5% (n=96) neither agreed or disagreed, while (35.9%; n=85) agreed or strongly disagreed and 23.6% (n=56) either agreed or strongly agreed.

Respondents were asked to report the one priority area that Eastern Health should focus on to improve the care and services delivered. The top responses were:

1	Primary Health Care	73.8% (n=175)
2	Emergency Services	63.7% (n=151)
3	Specialists	55.7% (n=132)
4	Mental Health and Addictions	53.2% (n=126)
5	Recruitment/retention of staff	49.4% (n=117)
6	Appointments (scheduling, notifications)	44.7% (n=106)

### Concluding Remarks

To conclude the survey, respondents were asked if there was anything else they would like to add. The majority of respondents provided no additional comments. For those who did, the most

common response was the need more doctors/nurses/healthcare professionals/increased availability/access to healthcare (19.4%; n=46).

## CONCLUSION

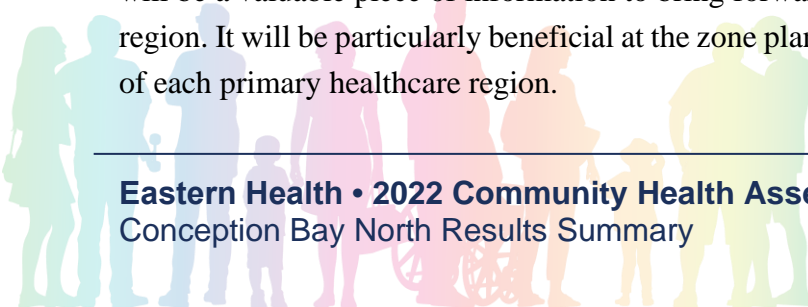

The 2022 Community Health Assessment Survey results will support health care planning for the provincial health authority, as well as planning in the Eastern zones. The information obtained provides valuable insight into the communities within the region with regard to health care and community concerns, as well as things that are working well or could be improved.

In terms of survey administration, Eastern Health's partnership with NLSA allowed for a random sampling methodology. Although this method took more time and garnered fewer respondents in comparison to the 2019 survey, it was successful in improving the representativeness of the sample, especially regarding gender and education level. However, comparing both sampling methods illustrated that there is more work to be done to improve response rates for young adults (18-34 years of age), as neither method was able to produce the desired number of responses for that age group.

It was found that, overall, results for CBN were similar to those for the region. One notable difference with regard to the top concerns was that, for the eastern health region, these concerns included cost of living, road quality, emergency services, addictions and substance abuse, and chronic disease. For CBN, drug/alcohol impaired driving of any vehicle replaced chronic disease in the top five. However, when asked to further rank these top community concerns, chronic disease made the top five for CBN as well. In terms of having a regular family doctor/nurse practitioner/primary health care provider, CBN results were similar to the region in that 77.6% indicated that they had one (in comparison to 78.8% for the region). Similarly, for those who have a family doctor and who access services, results showed high satisfaction rates.

Lastly, when asked what Eastern Health should focus on over the next three years to improve health care services, similar to the regional results, the main responses were primary health care, emergency services, and mental health and addictions. However, a focus on specialists was one of the top three areas identified for CBN and mental health and addictions was in the top four.

As we transition to one health authority, the results from the community health assessment survey will be a valuable piece of information to bring forward as the voice of residents from the eastern region. It will be particularly beneficial at the zone planning level, to help address the unique needs of each primary healthcare region.

# APPENDIX B: EASTERN HEALTH COMMUNITY HEALTH ASSESSMENT SURVEY

## EASTERN HEALTH COMMUNITY HEALTH ASSESSMENT 2022

### PURPOSE

Eastern Health, in partnership with the Newfoundland and Labrador Statistics Agency (NLSA), is doing a survey to help us understand the community health needs in the Eastern Health region.

### CONFIDENTIALITY

The information is being collected and protected under the authority of the [Access to Information and Protection of Privacy Act 2015](#) (ATIPPA, 2015) of the Province of Newfoundland and Labrador. Information collected will be shared with Eastern Health for the purposes of assessing specific community health needs. Please be assured that your answers will be kept strictly confidential, and any results published from this survey will be reported collectively. No identifying information will be published. The survey will take approximately 15 minutes to complete.

If you have any questions concerning privacy or confidentiality, have difficulty accessing or completing the survey, or would like to be sent an electronic link or paper copy, you can contact the Newfoundland and Labrador Statistics Agency by email at [NLSASurveys@gov.nl.ca](mailto:NLSASurveys@gov.nl.ca) or by telephone, toll-free, at 1-888-461-5244. Please note that if you call the toll-free number, you will be asked to leave a message. Representatives from Eastern Health are also available to answer any other questions you may have about the survey:

- Email: [planning@easternhealth.ca](mailto:planning@easternhealth.ca)
- Phone: toll free at 1-833-960-4570

### INSTRUCTIONS

For the purposes of navigating through the survey, the arrow pointing to the right will take you forward to the survey's next page, and the arrow pointing to the left will return you to the survey's previous page.

While completing the survey, you may exit at any time by closing your internet browser. When you are ready to resume, simply use the link and Survey Access Code provided to again access the survey. Your previous responses will be saved, and you will resume where you left off. However, once the final question has been answered and the

responses submitted, the survey will no longer be accessible. If this occurs, and you would like to change one or more of your responses, please contact the NLSA at [NLSASurveys@gov.nl.ca](mailto:NLSASurveys@gov.nl.ca).

*[Please proceed to the next page to begin the survey.]*

## SECTION A – PRIMARY CARE PROVIDER

AR1. The following questions ask about your access to a primary care provider (family doctor, nurse practitioner) and your satisfaction with the quality of services received. This section applies to both virtual and in-person care.  
*[Please proceed to the next page.]*

A1. If you needed to find health-related information for yourself or someone else today, how would you get that information? (Select all that apply)

- 1 Ask a family doctor
- 2 Ask a nurse practitioner
- 3 Ask a pharmacist
- 4 Ask a community or public health nurse
- 5 Call/visit a hospital/clinic
- 6 Search the internet (e.g., WebMD, Google search)
- 7 Search the Eastern Health website
- 8 Search social media (e.g., Facebook, Twitter)
- 9 Use 811 HealthLine
- 10 Contact a not-for-profit agency (e.g., Cancer Society, Mental Health Association) or a community group, church group, or library
- 11 Ask a friend or family member
- 12 Ask another health professional (please specify): \_\_\_\_\_

A2. The last time you needed care for a minor health problem (e.g., fever or unexplained rash), where did you go? (Select one response only)

- 1 Family doctor/nurse practitioner
- 2 Private-pay physician or nurse practitioner

- 3 Walk-in clinic
- 4 Collaborative team clinic
- 5 Hospital emergency department
- 6 811 HealthLine
- 7 Pharmacist
- 8 I do not have a place to get care for a minor health problem [Go to A4]
- 9 I chose not to seek treatment [Go to A4]
- 97 Other (please specify): \_\_\_\_\_

A3. The **last time** you needed care for a minor health problem (e.g., fever or unexplained rash), how long did it take you to receive treatment? (Select one response only)

- 1 Received treatment the same day
- 2 Received treatment the next day
- 3 Took two days or more to receive treatment
- 4 Never received treatment/left before receiving treatment

A4. Do you currently have a regular family doctor or nurse practitioner?

- 1 Yes
- 2 No [Go to BR1]

A5. **Overall**, how satisfied are you with the services provided by your family doctor/nurse practitioner?

- 1 Very satisfied [Go to BR1]
- 2 Satisfied [Go to BR1]
- 3 Neither satisfied nor dissatisfied [Go to BR1]
- 4 Dissatisfied
- 5 Very dissatisfied

A6. Why are you **dissatisfied** with the services provided by your family doctor/nurse practitioner? (Select all that apply)

- 1  Unable to easily contact the clinic/office
- 2  Offered virtual visit when an in-person visit is preferred
- 3  Wait list for an appointment is too long
- 4  Wait time in the clinic/office or window for virtual care visit is too long
- 5  Too far to travel
- 6  Hours of service are inconvenient
- 7  Communication barrier
- 8  Equipment quality is poor

A6. (cont.)

- 9  Health care provider(s) do not give you a chance to ask questions
- 10  You do not have trust and confidence in your health care provider(s)
- 11  Health care provider(s) do not treat you with respect
- 12  Health care provider(s) do not explain things in a way that is easy to understand
- 13  Health care provider(s) do not involve you in decisions about your care
- 14  Health care appointment(s) are rushed or limited to one issue per visit
- 97  Other (please specify): \_\_\_\_\_

## SECTION B – HEALTHCARE

BR1. The health care system provides a full continuum of health and community services, including public health, long-term care, acute (hospital) care, and private health care providers (e.g. pharmacy, private specialist clinics, vision/dental clinics). The following questions ask about your access to the health-care system and your satisfaction with the quality of services received (please DO NOT include Family Doctor/Nurse Practitioner services, as these were indicated previously). *[Please proceed to the next page.]*

B1. Sometimes we require health-care services but are unable to access them. Have you required any health-care service that you were unable to access during the past 12 months?

- 1 Yes**
- 2 No [Go to B3]**

**B2. Why were you unable to access services that you required during the past 12 months? (Select all that apply)**

- 1 Wait time for service was too long**
- 2 Cost of service was too high**
- 3 Transportation issues**
- 4 Too far to travel**
- 5 Unable to leave the house due to health problems**
- 6 Unable to access the services during scheduled time/hours of service**
- 7 Unable to get a referral**
- 8 Unable to contact the service**
- 9 Communication barrier**
- 10 Did not know the service was available at the time**
- 11 Service not available**
- 97 Other (please specify): \_\_\_\_\_**

**B3. Overall, how satisfied were you with the health-care services that you did use during the past 12 months?**

- 1 Very satisfied [Go to CR1]**
- 2 Satisfied [Go to CR1]**
- 3 Neither satisfied nor dissatisfied [Go to CR1]**
- 4 Dissatisfied**
- 5 Very dissatisfied**
- 6 I have not used any health-care services in the past 12 months [Go to CR1]**

**B4. Why were you dissatisfied with the health-care services that you did use during the past 12 months? (Select all that apply)**

- 1 Unable to easily reach the clinic/office**
- 2 Offered virtual visit when an in-person visit was preferred**
- 3 Wait list for an appointment was too long**
- 4 Wait time in the clinic/office or window for virtual care visit was too long**

- 5  Too far to travel
- 6  Hours of service were inconvenient
- 7  Cost of service was too high
- 8  Communication barrier
- 9  Equipment quality was poor
- 10  Health-care provider(s) did not give you a chance to ask questions
- 11  You did not have trust and confidence in your health-care provider(s)
- 12  Health-care provider(s) did not treat you with respect
- 13  Health-care provider(s) did not explain things in a way that was easy to understand
- 14  Health-care provider(s) did not involve you in decisions about your care
- 15  Health care appointment(s) were rushed or limited to one issue per visit
- 97  Other (please specify): \_\_\_\_\_

**SECTION C – COMMUNITY HEALTH AND WELLNESS**

CR1. The following questions ask about the health and wellness of your community, as well as your satisfaction with the resources and services available within your community. *[Please proceed to the next page.]*

C1. Please select the areas/issues that you are concerned about in your community. (Select all that apply)

- 1  Addictions and substance use (e.g., alcohol and/or drug misuse and abuse, gambling)
- 2  Bullying
- 3  Childcare (including affordability, lack of accessibility)
- 4  Chronic diseases (e.g., prevalence of diabetes, high blood pressure, cancer, etc.)
- 5  Crime and violence
- 6  Cost of living

- 7  Clean water supply
- 8  Distracted driving of any vehicle (e.g. texting or talking on cell phone while driving car, motorcycle, ATV, snowmobile, etc.)
- 9  Drug/alcohol impaired driving of any vehicle (e.g. car, motorcycle, ATV, snowmobile, etc.)
- 10  Education system
- 11  Emergency services
- 12  Environmental issues (e.g., contaminants in the air, water and soil)
- 13  Food security (access to sufficient, affordable, nutritious food)
- 14  Homelessness (including couch surfing)
- 15  Housing conditions
- 16  Low literacy levels
- 17  Mental health of community residents
- 18  Outmigration
- 19  Physical health of community residents
- 20  Poverty
- 21  Public transportation (including affordability, lack of accessibility)
- 22  Recreation programs/spaces
- 23  Resources for people with disabilities (e.g., accessible buildings)
- 24  Road quality
- 25  Seniors' resources/programs
- 26  Sexual health (including unplanned pregnancy, Sexually Transmitted Infections)

C1. (cont.)

- 27  Social isolation and lack of community involvement
- 28  Suicide
- 29  Tobacco use/smoking/vaping
- 30  Unemployment
- 31  Violence in the home (e.g., child abuse/neglect, domestic)
- 32  Working conditions (e.g., risks for injury on the job)
- 97  Other (please specify): \_\_\_\_\_

33  I am not concerned about the health and wellness of my community [Exclusive Response] [Go to C3]

[Programming note: if the respondent only chooses one option in C1, they will skip to C3]

C2A. (If number of options chosen in C1>=3) Of the issues selected in the previous question, please rank the 3 that you are most concerned about.

One at a time, click and drag an issue from the left column and drop it in the empty box on the right until the box contains the 3 issues you are most concerned about. Next, arrange the 3 issues in the box on the right in order so that the issue you are most concerned about is first, the one of next concern is second and the one of least concern is third.

C2B. (If number of options chosen in C1=2) Next, we want you to please rank the 2 issues from the previous question that you are most concerned about.

One at a time, click and drag an issue from the left column and drop it in the empty box on the right until the box contains the 2 issues you are most concerned about. Next, arrange the 2 issues in the box on the right in order so that the issue you are most concerned about is first and the one of lesser concern is second.

- 1  Addictions and substance use (e.g., alcohol and/or drug misuse and abuse, gambling)
- 2  Bullying
- 3  Childcare (including affordability, lack of accessibility)
- 4  Chronic diseases (e.g., prevalence of diabetes, high blood pressure, cancer, etc.)
- 5  Crime and violence
- 6  Cost of living
- 7  Clean water supply
- 8  Distracted driving of any vehicle (e.g. texting or talking on cell phone while driving car, motorcycle, ATV, snowmobile, etc.)
- 9  Drug/alcohol impaired driving of any vehicle (e.g. car, motorcycle, ATV, snowmobile, etc.)
- 10  Education system

C2A/C2B. (cont.)

- 11  Emergency services
- 12  Environmental issues (e.g., contaminants in the air, water and soil)
- 13  Food security (access to sufficient, affordable, nutritious food)
- 14  Homelessness (including couch surfing)

- 15  Housing conditions
- 16  Low literacy levels
- 17  Mental health of community residents
- 18  Outmigration
- 19  Physical health of community residents
- 20  Poverty
- 21  Public transportation (including affordability, lack of accessibility)
- 22  Recreation programs/spaces
- 23  Resources for people with disabilities (e.g., accessible buildings)
- 24  Road quality
- 25  Seniors' resources/programs
- 26  Sexual health (including unplanned pregnancy, Sexually Transmitted Infections)
- 27  Social isolation and lack of community involvement
- 28  Suicide
- 29  Tobacco use/smoking/vaping
- 30  Unemployment
- 31  Violence in the home (e.g., child abuse/neglect, domestic)
- 32  Working conditions (e.g., risks for injury on the job)
- 97  Other (please specify): \_\_\_\_\_

C3. There are many different groups and resources that aim to improve the health and wellness of a community. These include Eastern Health/Regional Health Authority, private health clinics (e.g., pharmacy, private specialist clinics, vision/dental clinics), churches, schools, town councils, resource centres, community advisory committees, recreation spaces/gyms, and other community groups (service clubs, coalitions, social and recreational groups).

Overall, how satisfied are you with the resources available to help deal with the health and wellness challenges in your community?

- 1  Very satisfied [Go to DR1]
- 2  Satisfied [Go to DR1]
- 3  Neither satisfied nor dissatisfied [Go to DR1]

- 4 Dissatisfied
- 5 Very dissatisfied

C4. Why are you dissatisfied with the resources available? (Select all that apply)

- 1 Community resources/supports are not available
- 2 Community resources/supports are not effective
- 3 Hours of service(s) are inconvenient
- 4 Cost is too high
- 7 Other (please specify): \_\_\_\_\_

## SECTION D – HEALTH STATUS

DR1. This section will help us describe the **health of the population who completed the survey.**  
*[Please proceed to the next page.] [Programming note: non-response will be allowed for questions in this section.]*

D1. In general, would you say your physical health is...?

- 1 Excellent
- 2 Very good
- 3 Good
- 4 Fair
- 5 Poor

D2. In general, would you say your mental health is...?

- 1 Excellent
- 2 Very good
- 3 Good
- 4 Fair
- 5 Poor

**D3. What would you like to do to improve your personal physical or mental health? (Select all that apply)**

- 1  Start/increase exercise, sports or physical activity
- 2  Eat healthier/eat more fruits and vegetables
- 3  Drink less alcohol
- 4  Reduce smoking (not including cannabis)
- 5  Reduce vaping (not including cannabis)
- 6  Reduce cannabis use (in any form)
- 7  Reduce illicit drug use
- 8  Reduce prescription drug misuse
- 9  Gamble less
- 10  Reduce stress
- 11  Enhance self-care
- 12  Reduce screen time (computer, Smartphone, TV)
- 13  Get the flu shot
- 14  Seek physical or mental health treatment
- 15  Get more sleep
- 16  Connect more with family, friends or community
- 97  Other (please specify): \_\_\_\_\_
- 17  There is nothing I would like to do [Exclusive Response] [Go to E1]

**D4. What is making it difficult for you to make the changes you identified in the previous question? (Select all that apply)**

- 1  Community resources/supports are not available
- 2  Community resources/supports are not effective
- 3  Not enough time available
- 4  Medical condition/injury
- 5  Lack of childcare
- 6  Cost is too high
- 7  Other (please specify): \_\_\_\_\_
- 8  Nothing in particular [Exclusive Response]

**SECTION E – HEALTH CARE PLANNING**

E1. From our last series of consultations to develop priorities for the organization, the following came through as areas that Eastern Health should focus on to improve health care and service delivery.

In your opinion, what priority area(s) should Eastern Health focus on to improve the care and services we deliver? (Select all that apply).

- |  |   |
|--|---|
| <input type="radio"/> 1 Mental Health and Addictions                             | <input type="radio"/> 11 Physical activity and healthy eating       |
| <input type="radio"/> 2 Primary Health Care                                      | <input type="radio"/> 12 Increase vaccinations (including flu shot) |
| <input type="radio"/> 3 Emergency services                                       | <input type="radio"/> 13 Smoking cessation                          |
| <input type="radio"/> 4 Specialists  | <input type="radio"/> 14 Chronic disease prevention                 |
| <input type="radio"/> 5 Senior's care/Home and Community Supports                | <input type="radio"/> 15 Patient safety                             |
| <input type="radio"/> 6 Appointments (scheduling, notifications)                 | <input type="radio"/> 16 Patient and community engagement           |
| <input type="radio"/> 7 Hours of service   | <input type="radio"/> 17 Facility cleanliness/maintenance           |
| <input type="radio"/> 8 Services outside the hospital (urgent/non-emergent care) | <input type="radio"/> 18 Reduce waste (financial and environmental) |
| <input type="radio"/> 9 Remote Patient Monitoring                                | <input type="radio"/> 19 Recruitment/retention of staff             |
| <input type="radio"/> 10 Virtual care  | <input type="radio"/> 20 Employee psychological health and safety   |
|  | <input type="radio"/> 97 Other (please specify): _____              |

E2. Eastern Health's core values identify what we stand for and guide the behavior of all individuals (physicians, employees & volunteers) in the organization as we provide services and interact with others.

Our current values are accountability, caring, collaboration, excellence and respect.

Please indicate your level of agreement with the following statement: *Eastern Health is living up to its core values.*

- 1 Strongly Agree
- 2 Agree
- 3 Neither Agree Nor Disagree
- 4 Disagree
- 5 Strongly Disagree

E3. Is there anything else that you would like to add about the health of the population and the health care services provided in the Eastern Health region?

Yes (enter comments): \_\_\_\_\_

No

## SECTION F – DEMOGRAPHICS

FR1. This section will help us **describe the population who completed the survey**. Questions are being asked for research and statistical purposes only. Please be assured that your answers will be kept strictly confidential.  
*[Please proceed to the next page.] [Programming note: non-response will be allowed for questions in this section.]*

F1. How long have you lived in your current community?

Less than 2 years

11 - 20 years

2 - 5 years

More than 20 years

6 - 10 years

F2. Please indicate your age.

18-24

55-64

25-34

65-74

35-44

75-84

45-54

85+

F3. What is your gender identity? (Select all that apply)

- |                                     |   |
|-------------------------------------|---|
| 1 <input type="radio"/> Man         | 6 <input type="radio"/> Agender                                 |
| 2 <input type="radio"/> Woman       | 7 <input type="radio"/> Genderqueer                             |
| 3 <input type="radio"/> Transgender | 8 <input type="radio"/> Genderfluid                             |
| 4 <input type="radio"/> Two Spirit  | 9 <input type="radio"/> Gender nonconforming                    |
| 5 <input type="radio"/> Non-Binary  | 97 <input type="radio"/> Other identity (please specify): _____ |

F4. What is the highest level of education you have completed? (Select one response only)

- 1  Some secondary school or high school
- 2  Completed secondary school or high school
- 3  Started university or college education but did not complete it
- 4  Completed a technical, vocational or community college program
- 5  Completed a bachelor's degree
- 6  Completed a graduate or professional degree

F5. Which of the following describes your employment status? (Select one response only)

- |  |  |
|--|--|
| 1 <input type="radio"/> Employed full time (including self-employed or on a work training program) | 6 <input type="radio"/> Unemployed and looking for work                          |
| 2 <input type="radio"/> Employed part time (including self-employed or on a work training program) | 7 <input type="radio"/> Unemployed and not looking for work                      |
| 3 <input type="radio"/> Seasonal worker  | 8 <input type="radio"/> Unable to work due to a long-term sickness or disability |
| 4 <input type="radio"/> Commuting/rotational worker  | 9 <input type="radio"/> Looking after my home/family                             |
| 5 <input type="radio"/> Student  | 10 <input type="radio"/> Retired from paid work                                  |

## SECTION G – RESPONDENT FEEDBACK

G1. Do you have any further comments related to this survey or its content?

[easternhealth.ca](http://easternhealth.ca)
